

# Vetra

Quando la chiave di un arredo è la luminosità, la scelta va naturalmente su Vetra. Caratterizzata dalle ante a tutto vetro, questa linea permette infatti il massimo passaggio della luce. Il suo design minimale si adatta a tutti gli stili, classici e moderni, anche grazie all'abbinamento con telai e cornici che possono appartenere ad una qualsiasi delle altre linee di porte. Per Vetra, proponiamo vetri monolitici spessi 10 mm, robusti e sicuri, sia trasparenti che acidati. Possiamo applicarvi qualsiasi decorazione, come la stampa digitale, la sabbiatura, la laccatura, lo scavo o l'inserimento al suo interno di tessuti o fili di metallo.

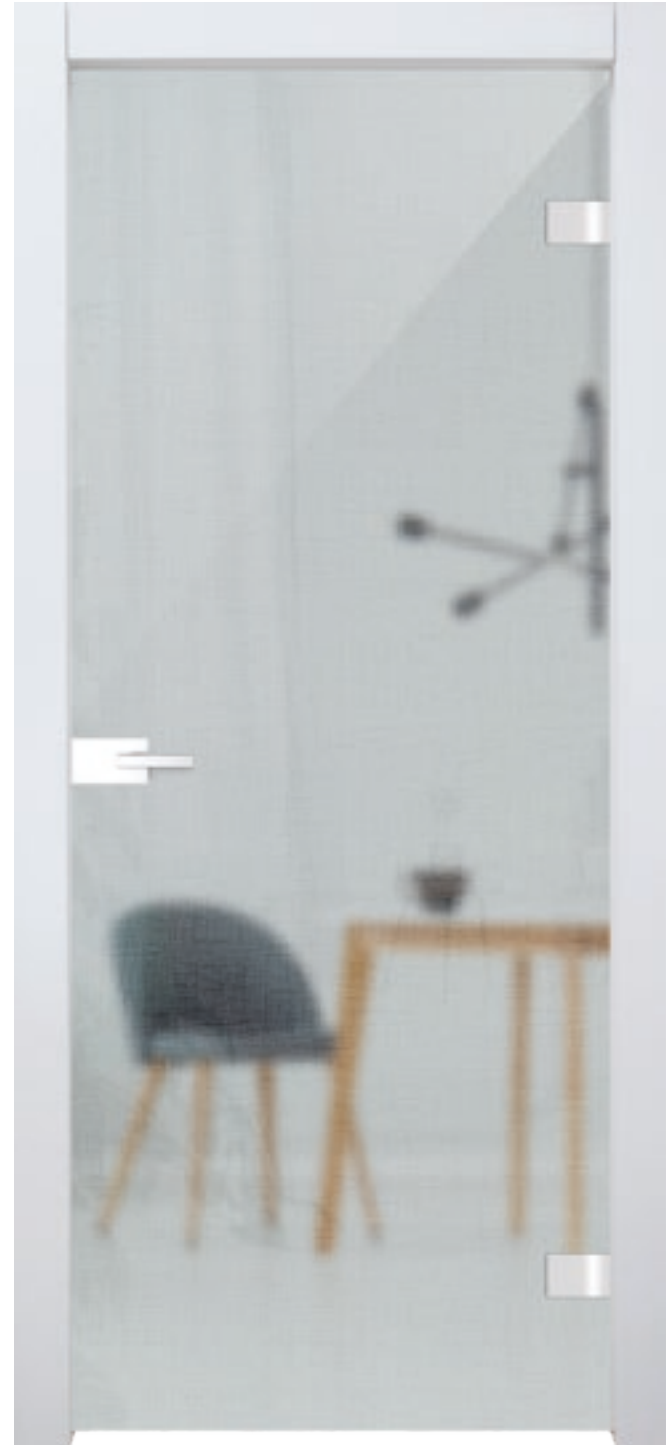

When the key to a piece of furniture is brightness, the choice is naturally Vetra. Characterised by all-glass doors, this line allows for the maximum passage of light. Its minimal design adapts to all styles, classic and modern, also thanks to the combination with architraves and frames that can belong to any of the other door lines. For Vetra, we offer 10 mm thick monolithic glass, robust and safe, both transparent and etched. We can apply any decoration, such as digital printing, sandblasting, lacquering, engraving or inserting fabrics or metal wires inside.

## Vetri materia / materia glass

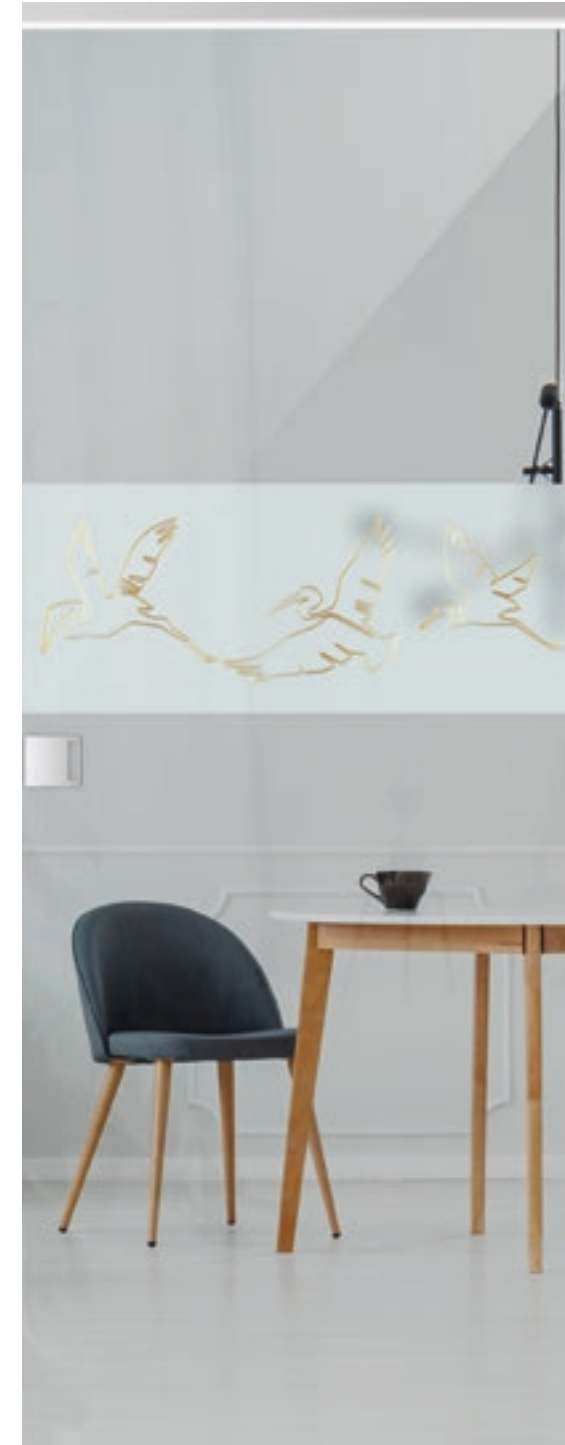

Materia è una lavorazione che prevede fili di acciaio, rame o ottone inseriti all'interno dei vetri stratificati. I fili possono comporre disegni di vario genere. È possibile scegliere tra vetro trasparente o acidato. Disponibile anche la versione in doppia finitura, con fascia acidata su vetro trasparente o fascia trasparente su vetro acidato. Materia is a process that involves steel, copper or brass wires inserted inside the laminated glass. The wires can create various designs. You can choose between transparent or frosted glass. Also available in the double finish version, with frosted band on transparent glass or transparent band on frosted glass.
